

Corporate Background: Live Poker

Live Poker (www.livepoker.com) is an innovative online poker community that engages players with the thrill of realistic, fast-paced game play. From Texas Hold'em and Omaha to Seven Card Stud, the Live Poker online experience offers the excitement of poker with the safety of bank-level security and the comfort of fast, friendly support. The site launched in April 2005 and traffic continues to quickly grow.

Live Poker pioneered the first poker download for Mac users and continues to offer both PC and Mac customers the ultimate online poker experience. Live Poker's authentic game play, rich 3D graphics and customized avatars (the virtual representation of the player) pull players right into the action for a realistic poker experience that's fun, fast and engaging.

Players can hone their skills in "play money" poker rooms, or play in real time for real money against other poker players from around the world. The Live Poker site also offers tips and tricks players can use to improve their strategy, plus an online forum for discussions between players and Live Poker staff.

All gaming and financial transactions use 256-bit encryption bank-level security protocols, designed by a former chief technical officer for a major international banking organization. Live Poker is wholly owned by Fun Games International N.V., headquartered and licensed in the Netherlands Antilles. Live Poker licenses the immersive, full screen, three-dimensional poker software that gives LivePoker.com its realistic play from Royal Games International (www.royalgamesinternational.com).

Live Poker is registered in Curacao, Netherlands Antilles, where it is licensed, regulated and authorized by Cyberluck Curacao N.V. (www.cyberluck.com), the master gaming licensing and hosting authority for the Central Government of the Netherlands Antilles. Cyberluck allows Live Poker to legally conduct its online gaming operations under the jurisdiction of the Government of the Netherlands Antilles. Cyberluck's license-issuing authority provides legal, legitimate, responsible licensing protection, supervision and security to approved clients.
